

Inventions Class

The Bible has one true meaning.

When we READ the Bible,
we want to FIND that meaning,
and APPLY it to our lives
as God CHANGES our hearts to
be MORE LIKE JESUS!

Dear Parents,

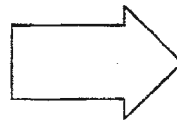

Today our experiment helped us understand that we have to look carefully for the meaning of a Bible passage. We used film canisters filled with different items and our ears had to listen carefully to find the ones that matched.

The beads your child is bringing home are special color-changing beads that are UV activated. In the sun, they will become colorful! This can help us remember a great lesson about studying the Bible. When something is illuminated, it is "lit up." When the Holy Spirit helps you understand truth from the Bible, it's like He is "lighting up" your mind! Spend some time letting the Spirit "light up" your mind this week!!

Study a verse of Scripture as a family this week using this idea:

When you read the Bible,
ask yourself these **three questions**
about the verses you are reading:

What does it say?
What does it mean?
What does God want me to do?

Purpose: To find out if you can choose the matching canister by LISTENING carefully.*

Materials: 1 canister filled with a surprise, 6 other canisters labeled 1-6.

Hypothesis: Do you think you can pick out the matching container by listening to the noise each canister makes? YES NO

Procedure: Shake your canister and listen to the sound it makes. Compare it with each of the canisters labeled 1-6. Mark on this chart ➡ whether the sound matches your canister or not.

Conclusion: Were you able to match your canister to the right one?

Which number was it? _____

	Yes	No
1		
2		
3		
4		
5		
6		

There is a true meaning to each passage of Scripture...when we study God's Word, we are trying to find that meaning and apply it to our lives!
